Letter No. 7324 - Ml. 288-10-1, dated the 7th March 1911, from the Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments, forwarding a copy of the Chief Engineer's Note dated the 9th February 1911, regarding the collection of excess water-supply charges in the Bangalore City, and requesting the submission of the views of the Municipal Council thereon in the matter of the transfer of collection work proposed by the Chief Engineer.

Resolution.—In view of the facts that the present system of dual control has tended to cause unnecessary delay and inconvenience to the public and that on the ground of expediency, it is desirable that the department which supplies water and regulates its expenditure should also undertake to collect the charges due thereon, the Council are agreeable to accept the Chief Engineer's proposals to transfer the collection work to the Water-Supply Department, on the condition that the said department will hold itself directly responsible to the house-owners in regard to the following points :—

(1) Immediate attention to the complaints regarding leakages in taps or pipe-lines relating to house-connections.
(2) Immediate attention to the complaints regarding meters which get out of order.
(3) Immediate attention regarding leakage of taps and fountains in public streets.

2. The draft rules on the above and other points incidental to the change of the collecting agency that may be framed by the Chief Engineer will, of course, be forwarded to the Council for opinion.

3. The Council regret to observe that the remarks passed in the Note under reference on the work of the Municipality are apparently based on one-sided enquiry. They are in a position to state that the work of collection of the excess water charges, if slow and unsatisfactory, is due not to any fault of the Municipality, but to belated bills and wrong meter-readings leading to protracted correspondence received from the Water-Supply Department.
